Profile

Dedicated software developer with prior strong leadership skills from running a dental practice for several years. Passionate about software development, building beautiful user friendly applications with a love for problem solving. Seeking an opportunity with your company to provide my skills with Object-Oriented Design, Vue, C#, .Net, and JavaScript.

Skills

- HTML/CSS
- JavaScript
- Node.js
- Mongoose
- Agile/Scrum
- Bootstrap
- Vue.js
- MongoDB
- C#/.Net
- MySQL

Experience

Software Development Student

Codeworks | August 2021 - November 2021

- Learned full-stack development including HTML, CSS, SASS, Bootstrap, Javascript, Vue.js, Node, Mongo.db, C#, DotNet Core, and MySQL
- Gained over 500 hours of experience as a full-stack software developer
- Implemented the scrum process during several group applications, collaborating and communicating effectively with peers to ensure timely delivery of completion
- Gained organization skills, and how to have precise clean code that is structured and up to standards.

Applications

PressPlay

- Application made for musicians to collaborate and make great music together.
- Full-stack developer
- Vue, MongoDB, Firebase, Javascript, SCSS, Bootstrap

TheNetwork

- Social media application where current students and alumni at Boise CodeWorks can share posts and connect with one another.
- Front-end developer
- Vue, Javascript, SCSS, Bootstrap, Heroku Api

BugLog

- Full-stack application utilizing Vue.js, MongoDB, Javascript, and Bootstrap.
- Full-stack developer
- Organizes and logs bugs that are currently open/closed

Dental Office Manager

Eagle Dental Care | August 2017 - August 2021

- Promoted to Dental Office Manager from Dental Assistant in 2019 due to my work ethic, leadership skills, and strong knowledge of dental insurance, claims, and running an office.
- Processed over 50 insurance payments per day, as well as submitted dental claims on behalf of the patient.
- Implemented monthly, quarterly, yearly spreadsheets to keep data for the dental office's stats which helped track our data.
- Increased monthly profit by 55% by getting CareCredit established at our practice, implementing coverage tables for every patient to maximize their benefits.
- Verified over 40 patients insurance benefits per day and added them into their coverage tables.
